

Strategy

Targets

Vision

LHBT will deliver high quality, sustainable heritage-led regeneration projects. We will re-use historic buildings throughout Greater London to create innovative social solutions and cultural benefits

LONDON HISTORIC BUILDINGS TRUST

Strategic plan programme 2020 to 2024

To sensitively repair & convert neglected historic buildings - those on **Heritage at Risk Register** and those that are not

To develop heritage led regeneration re-use schemes informed by the **needs and aspirations of a local community**

To act as **development partner** for owners seeking a scheme that places the historic building, its **local environment and community needs** at forefront

To support, **inform/educate and facilitate** at a local level, working with local community groups and fledgling trusts

To act as a catalyst for sensitive regeneration in the **most deprived areas** of London

Aims

Deliver high quality projects with a priority on **High St** buildings

Achieve **long-term sustainability** - new fundraising, new rental income, offering consultancy services, exploring social finance

2 listed buildings at risk brought back into use  
5-10 options appraisals facilitated  
2-3 buildings regenerated in wider area  
4 project partnerships entered into  
3 community groups supported  
4-5 direct jobs, 2-5 indirect jobs created  
15-20 construction jobs

Embrace groups and people who might **not otherwise engage** or associate with heritage assets

**Share our skills and knowledge** – workshops, talks, supporting High St HAZ and FHSF areas

150-200 people engaging directly with local heritage  
10-15 local people setting up friends groups  
5-10 primary school year group visits  
3 volunteers engaged  
120 people trained

**Social impact** – projects which lead to better places for people to live, work and visit; local heritage in better condition, better understood & valued; supporting a sustainable environment

Engage with **volunteer-led** groups to help save their local buildings

1 project with renewable energy or increased efficiency  
2 maintenance and management plans  
1 project with +ve impact on natural environment
